

Dental Insurance

Why is having a good dental plan so important?

Because a healthier smile can be important to maintaining overall health.

Maintaining good oral health matters. When your preventive care is covered, you're more likely to go for cleanings and checkups — this can help you avoid problems before they become too costly or complicated. Plus, going to the dentist regularly can help prevent problems that have been linked to diabetes or heart disease.¹

That's where a good dental plan comes in. The right coverage makes it easier to visit the dentist and helps lower your costs. You get support to keep up with dental cleanings and other preventive care that helps you avoid costly problems and live healthier. Now that's something to smile about.

While costs will vary based on where you live. With a dental plan, you get protection against costs for unexpected dental care with low to no costs for preventive care.

Keep in mind this is only an illustration. Your costs and savings could vary based on your plan design, where you live, and whether your plan requires a copayment or coinsurance. Please see your Plan Summary for details about your specific coverage.
